Hi Joyce,

I spoke with Bob Pellegrine (copied here) who will be the Construction Superintendent for Lots 5-8. He says he usually has the property corners staked by a surveyor, puts in chainlink construction fencing along the property lines, and silt fence along the grading limits, before the start of grading and construction.

Grading would not occur where the waterfall is (see attached screenshot). Hopefully, some of the oak trees can remain or if not perhaps they can be moved and replanted on your property.

I asked Bob if he has time to meet with you and go over the steps with you prior to his vacation in June, and he says he will be happy to meet with you at the site. He will reach out to you via email. If you can send him your phone number, that may be easier for coordination purposes.

Thanks

Hi Camille,

I have some questions about how the property line will be handled during the construction. Will there be some sort of fencing put up--even that orange plastic stuff, so the excavators will know how far to go?

And I am wondering about how close to the property line they will excavate at all. It's hard to tell from the drawings. We have been planting oak trees on that slope for some time, thinking it would make a screen when the house next door was built. But we were told when we moved here that the entire slope was ours. In fact, the surveyors indicate that much of the slope is not ours. There are some small trees that are very close to the property line, which are not on the plans. I'm hoping they will not mow them down willy nilly if they don't actually encroach on what has to be excavated. Is there someone I can talk to about it? Or do you know?

I'm also wondering what they have planned for our waterfall, which appears as gray lines on the plans, running into our pond. It doesn't appear that they have anything planned for it, even though it is largely on the neighbors' property. It has been there since about 1960, as it was built by the first owner of the house (who bought it in 1958).

It would be most useful if someone could come out here to look at what I am talking about, and to give us some clarification on the plans.

Thanks very much,
Joyce

Hi Joyce,

FYI, the Community Development Director has extended the comment period for the EIR Addendum by 30 days to 5pm on June 17, 2021.

Thanks

Subject: More time to review Highland Estates Subdivision Project Addendum to the Highland Estates Final Environmental Impact Report

CAUTION: This email originated from outside of San Mateo County. Unless you recognize the sender's email address and know the content is safe, do not click links, open attachments or reply.

Dear Camille,

Regarding San Mateo County's notification letter dated May 3 with subject "Consideration of a proposed Minor Modification to an approved Resource Management (RM) Permit (PLN2006-00357) for the development of Lots 5, 6, 7, and 8 (BLD2016-00161 through BLD2016-00164), in the San Mateo Highlands Area", because of the significant impact this construction project will have to the hillside open space along Ticonderoga Drive, which includes a possible risk of landslide in the area, I request that the County give the Highlands community an additional 45 days beyond May 17 to review and respond to the lengthy 289-page project addendum document "Highland Estates Subdivision Project Addendum to the Highland Estates Final Environmental Impact Report SCH No. 2007052068" referenced in the 'minor modification' letter.

Thank you,

Joyce Pennell
